

# FORMRACK®

Disinfection solution

# FORMRACK.

FORMRACK was founded in 1997, and since then the company has become a powerful player in the cabinet market due to its manufacturing and export figures.

Our major production portfolio is Rack Cabinets and accessories which are not only in standard measurements but also customized by the customers.

We improve ourselves under favor of 20 years' experience of cabinet production and quality staff.

Within the momentum of Covid-19 situation, FORMRACK decided to take responsibility of helping people preventing the spread of the virus.

With this responsibility we took necessary actions to come up with special cabinets, walkthroughs and booths of disinfection solutions.
